The complete hot drinks system

ARGENTO
INNOVATION BY DESIGN

The only One you'll ever need

Introducing the Argento One. For Life.

The Argento way!

Argento - one of the most innovative and forward thinking manufacturers of beverage machines has once again placed itself at the forefront of design and innovation. The result is the **Argento One**.

The striking surface of the **Argento One** contains a handcrafted 4 canister tabletop beverage machine, with 8 drink options, which can be dispensed into the standard one cup size and jug facility, or as 'Standard, Medium and Large' cup option. Each ingredient canister can be directed to dispense a particular choice of drink, allowing you to shape and control the drink consistently.

The technology extends to a precision hot water management system and by avoiding recovery delays, it allows you to maintain a constant delivery. Extraordinary power from a 13 amp supply!

With a clear design philosophy and long term quality, built into every machine, 'the upgrade path' will always allow the **Argento One** to have the latest technological advances with the same machine year in year out - the **Argento One** really will be the only **One** you will ever need. For life.
